

ONE SIMPLE PAYMENT SOLUTION

RM GATEWAY

powered by Paygistix®

Traditional Tip Adjust

Tokenization

Real-time Transaction Management

Online Signature Capture

RM GATEWAY powered by Paygistix will futureproof your POS payment processing.

EMV. NFC. Pay-at-theTable. Futureproof.

Gain support for today's emerging payment technologies like EMV, NFC (Apple Pay®, Android Pay®, Samsung Pay and more) and Pay-at-the-Table while implementing an adaptable payment solution that will carry you forward well into the future.

Minimize Scope of PCI DSS

Maintain the benefits of fully integrated payment processing in your POS system while limiting your data security risk to that of a standalone credit and debit card terminal.

Competitive Rates, Liability Protection & Data Security

Maintain the competitive rates you've worked hard to establish under your current processing relationship while shielding your business from EMV chargeback liability, tackling the payment challenges of our time and taking a leap forward in data security.

Real-time Online Transaction Management

Query transactions, run reports and perform critical transaction management functions that would otherwise require assistance from your payment processor.
